Document Identifier: **PMC8006664**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Field Sample Permit: We collected blood samples in collection tubes and centrifuged them at 2000 g for 15 min.
Consent: Study protocol approvals and patient consent The study protocol was approved by the Human Ethics Review Committee of Kumamoto University.
IRB: Study protocol approvals and patient consent The study protocol was approved by the Human Ethics Review Committee of Kumamoto University.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Methods Study population We retrospectively studied 32 patients with ATTRv amyloidosis (mean age: 51.1 ± 2.4 years, male: 53%, twenty-seven V30M, two Y114C, one G47R, one T49S, and one G61L), eight asymptomatic TTR mutation carriers (mean age: 33.6 ± 2.3 years, male: 25%, five V30M, two S50I, and one G47R), and eight healthy volunteers (mean age: 32.0 ± 3.4 years, male: 63%) who visited Kumamoto University Hospital from October 2016 to May 2017
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Plasma GDF-15 levels were measured by using a sandwich enzyme immunoassay technique (Quantikine; R&D Systems, Minneapolis, MN, USA).	Quantikine; R&D Systems		
All analyses were performed with JMP Version 5.1 (SAS Institute Japan, Tokyo, Japan).	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical analysis We evaluated the data via Student's t-test, the Pearson correlation coefficient, and the Spearman rank correlation coefficient.	t-test
	Pearson correlation
	Spearman rank correlation

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
