SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: All studies included complied with the Declaration of Helsinki, the protocols were approved by the responsible ethics committees, and all patients gave written informed consent.
Consent: All studies included complied with the Declaration of Helsinki, the protocols were approved by the responsible ethics committees, and all patients gave written informed consent.
Inclusion and Exclusion Criteria
The detailed inclusion and exclusion criteria are listed on the webpage of the DRKS.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
17 Images were blinded to strain analysis, cine, and volumetric measurements, respectively.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis Statistical analysis was carried out with GraphPad Prism software version 8.4.2 and R version 3.5.1 (2018-07-02) (R Foundation for Statistical Computing, Vienna, Austria).	GraphPad Prism		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Normality of variables was assessed by visual assessment of normality curves and the Shapiro-Wilk test.	Shapiro-Wilk test
Comparison between groups for continuous variables was performed with a one-way ANOVA for normally distributed data.	ANOVA
When a significant P value was obtained using one-way ANOVA, the group means were examined by the Holm-Bonferroni method.	Holm-Bonferroni

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
