SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: 2.2 Ethics This study was approved by the South-East Norway Regional Committee for Medical and Health Research Ethics (reference no. 135310), with a waiver for informed consent.
Consent: 2.2 Ethics This study was approved by the South-East Norway Regional Committee for Medical and Health Research Ethics (reference no. 135310), with a waiver for informed consent.
Field Sample Permit: 2.3 Organisation and data collection The present study is a collaboration between Oslo University Hospital and the Norwegian Intensive Care and Pandemic Registry (NIPaR), a national registry established in 1998.
Inclusion and Exclusion Criteria
2 METHODS 2.1 Participants We included all adult patients (>18 years) who were admitted to a Norwegian ICU with a diagnosis of COVID-19, between 10 March 2020 and 19 June 2020.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis

We did not include patient management data in multivariable analysis due to the risk of time-dependent bias (immortal time bias) and lack of statistical power to model this with sufficient precision.	
Replication	
not required.	
Protocol Information	
Identifiers: This study was registered at ClinicalTrials.gov (NCT04601090).	NCT04601090 Warning: study registration date October 15, 2020 is after study start date September 16, 2020

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
StataSE ver 15.1, StataCorp, College Station, TX, USA was used for analysis.	StataCorp		Suggestion: Stata, RRID:SCR_012763(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
