SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical approval was obtained from the institutional review board of KFSH&RC.
Consent: The purpose of the study was explained to participants in both oral and written forms, and informed consent was obtained.
Inclusion and Exclusion Criteria
Exclusion criteria included presence of known neurological or psychiatric diseases, pregnancy, visual or hearing defects, or any brain pathology or abnormal brain morphology.
Attrition
Two of the developed tasks (Sentence Completion and Object Naming) were not used in data collection (one because of challenges relating to collection of response accuracy, and the latter due to being covered by other tasks as to region activation).
Sex as a biological variable
not detected.
Subject Demographics
Age: Twenty-four healthy adults (50 men) age 22 to 39 years (mean=29.41 years) participated in this study.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Data Information	
Identifiers: The participant was asked to think about words belonging to the category displayed (Table 1) . 3 . Silent Word Generation (SWG) As an attempt to assess activation in the DLPC and inferior frontal gyrus , this covert word generation task,25,26,28 three Arabic letters were displayed in each block (each letter lasted for 10 seconds) , followed by 30 seconds rest , alternating over 4:30 minutes .	task,25,26,28

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Literature review was performed through electronic search (Google Scholar, PubMed).	Google Scholar		Suggestion: Google Scholar (RRID:SCR_008878)(link)
	PubMed		Suggestion: PubMed (RRID:SCR_004846)(link)
FMRIB Software Library (FSL) software was used to analyze fMRI data .	FMRIB		Suggestion: FSL, RRID:SCR_002823(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
