SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Field Sample Permit: We received sample-level VCFs with genotypes on the hg19 build of the human reference genome from the Broad Institute to prepare the samples for phasing and imputation, we filtered out failing probes and duplicatemulti-allelic variant probes as marked in the FILTER field of the VCFs.
Inclusion and Exclusion Criteria
not required.
Attrition
Of the 60 samples in experiment D sequenced on BGI machines, 58 passed QC and two failed due to contamination.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
Each of the 120 samples was genotyped in triplicate.
Number: Each of the 120 samples was genotyped in triplicate.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All samples were imputed to the 1000 Genomes Phase 3 release haplotype reference panel on hg19 (The 1000 Genomes Project Consortium 2015) in a leave-one-out manner (such that the cell line the sample belongs to was not in the panel being used).	1000 Genomes Project		

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
