SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was approved by the Research Ethics Committee of Federal University of Sao Paulo.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
Shoulder rotation passive ROM and maximum serve speed of adolescent male volleyball athletes were measured to investigate associations.
Subject Demographics
Age: Participants Participants were selected from an initial interview to match the eligibility criteria, which included volleyball athletes aged between 15 to 23 years.
Randomization
not detected.
Blinding
not detected.
Power Analysis
11 With a power of 80 and significance of 5, the minimum number of athletes required for the present study were 30, 5, and 3, according to the standard deviations of IR, ER and TRM, respectively.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Methods Data were analyzed using the Statistical Package for Social Sciences (SPSS) software for Windows version 18.0 (SPSS, Inc., Chicago, Illinois).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
After checking for normality, differences between dominant and nondominant upper limb ranges of motion and between on-and off-court ball velocities were investigated through paired t-tests.	t-tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
