SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: All the patients signed a voluntary informed consent.
Inclusion and Exclusion Criteria
The inclusion criteria were age 18 to 45 years and history of vaginal childbirth (not earlier than 6 months ago).
Attrition
not detected.
Sex as a biological variable
MATERIALS AND METHODS Inclusion Criteria and Ethical Principles Between the 2018 and early 2019, 95 postpartum women in reproductive age referred to the Hospital Lapino (MD Medical Group) were considered for the study.
Subject Demographics
Age: The inclusion criteria were age 18 to 45 years and history of vaginal childbirth (not earlier than 6 months ago).
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
There was a large number of patients to provide sufficient sample for statistical analysis, further verified by G-power 3.1.9.2 software.	G-power		
25 Gathered results were statistically analyzed using Statistica version 6 software (StatSoft Inc, Tulsa, OK) using the paired t test and 2-way analysis of variance followed by least significant difference post hoc test.	Statistica		Suggestion: STATISTICA (RRID:SCR_014213)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
25 Gathered results were statistically analyzed using Statistica version 6 software (StatSoft Inc, Tulsa, OK) using the paired t test and 2-way analysis of variance followed by least significant difference post hoc test.	t test
	analysis of variance
Assumption of normality was tested by Kolmogorov-Smirnov and Lilliefors tests.	Kolmogorov-Smirnov
	Lilliefors tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
