Document Identifier: **PMC8019197**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not detected.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
This culture system was duplicated and repeated three times.
Number: This culture system was duplicated and repeated three times.
Cell Line Authentication

not detected.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Antibodies			
Then , protein bands were visualized by human anti-GPR35 antibody (NOVUSBIO) , human anti-b-catenin antibody (Proteintech) , human anti-NF-kbp105 antibody (Cell Signaling Technology) , and human anti-TGF-b1 antibody (Abcam) .	anti-GPR35		
	anti-b-catenin		
	anti-NF-kbp105		
	anti-TGF-b1		
Experimental Models: Cell Lines			
These molecules were all tested in the Panc-1 cell line.	Panc-1		Suggestion: RRID:CVCL_0480(link)
Software and Algorithms			
DMEM was supplemented by 10 fetal bovine serum (FBS) (Gibco) and 1 penicillinstreptomycin (ATLANTA Biologicals).	Gibco		
	ATLANTA Biologicals		
2.4.1 The estimation of model parameters In order to get the value of the parameters in Equation (1) based on relative mRNA expression levels , an algorithm (fmincon and lsqnonlin function) was programmed to estimate the 35 parameters by Matlab 2017b .	Matlab		Suggestion: MATLAB (RRID:SCR_001622)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Effective siRNAs have been selected for sensitive analysis test.	analysis test
Differences between the values were evaluated using one-way analysis of variance (Tukeys post hoc test), except in vivo biocompatibility experiment (Tukeys post hoc test).	analysis of variance
	Tukeys post hoc test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
