SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical Approval and Consent to Participate This study has been approved by the Institutional Review Board of An-Najah National University, and approval from the Palestinian Ministry of Health.
Consent: Informed consent was waived by the IRB due to the retrospective chart review and.
Inclusion and Exclusion Criteria
Exclusion Criteria Non-urothelial cell carcinoma pathology, less than 12 months of follow-up, muscle invasive bladder cancer (MIBC), lacking mental or physical capacity to communicate with the interviewer, and possible upper tract TCC on contrast imaging.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Analysis All analysis was performed with IBM Statistical Package for Social Sciences program (SPSS) Statistics version 21.0.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The Pearsons Chi-square test or Fishers exact test (as appropriate) were applied to assess the differences in categorical variables.	Chi-square test
	Fishers exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
