Document Identifier: **PMC8030701**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Written informed consent was obtained prior to sample collection .
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
The mass spectrometer was operated in data-dependent acquisition mode and triplicate measurements were done in parallel using collision-induced dissociation (CID) , HCD , and electron-transferhigher-energy collision dissociation (EThcD) for MSMS fragmentation .

Number: The mass spectrometer was operated in data-dependent acquisition mode and triplicate measurements were done in parallel using collision-induced dissociation (CID) , HCD , and electron-transferhigher-energy collision dissociation (EThcD) for MSMS fragmentation .	
Data Information	
Availability: Data and software availability The MS proteomics data have been deposited to the ProteomeXchange Consortium via the PRIDE (21) partner repository with the dataset identifier PXD014917 and 10.6019PXD014917.	
Identifiers: Data and software availability The MS proteomics data have been deposited to the ProteomeXchange Consortium via the PRIDE (21) partner repository with the dataset identifier PXD014917 and 10.6019PXD014917.	PXD014917

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Raw shotgun LC-MSMS data were searched with Proteome Discoverer (PD) (version 2.2 , Thermo Scientific) using the Mascot search engine (version 2.6.1) against a UniProt Swiss-Prot database (17): Homo sapiens (canonical and isoform) (December 2018 , 20,417 entries) and filtered with a 1 false discovery rate (FDR)	Proteome Discoverer		Suggestion: Proteome Discoverer, RRID:SCR_014477(link)
	Mascot		Suggestion: Mascot (RRID:SCR_014322)(link)
	UniProt		
Statistical analysis The statistical analysis and all figures were generated with R version 3.4.2, using ggplot2 (version 2.2.1).	ggplot2		Suggestion: ggplot2 (RRID:SCR_014601)(link)
Data and software availability The MS proteomics data have been deposited to the ProteomeXchange Consortium via the PRIDE (21) partner repository with the dataset identifier PXD014917 and 10.6019PXD014917.	PRIDE		Suggestion: Pride-asap (RRID:SCR_012052)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical tests included Pearson correlations and unsupervised hierarchical clustering.	Pearson correlations

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
