SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was approved by the Mount Sinai Hospital Research Ethics Board (MSH REB 17-0007-E).
Inclusion and Exclusion Criteria
Clinicians directly involved in survey tool content development or testing were excluded from the pre and post survey .
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
We calculated that a sample size of 80 completed surveys would provide us with 80 power to detect a 1-point difference in Likert responses for preintervention versus postintervention surveys .
Replication
If the tool was present , sections were graded as 1 (not at all complete) , 2 (partially complete) , and 3 (fully complete) in duplicate by T . B . and J . R . with discrepancies resolved by consensus .

Number: If the tool was present , sections were graded as 1 (not at all complete) , 2 (partially complete) , and 3 (fully complete) in duplicate by T . B . and J . R . with discrepancies resolved by consensus .

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analyses were performed using Microsoft Excel 2013	Microsoft Excel		Suggestion: Microsoft Excel, RRID:SCR_016137(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Pre and post survey responses were compared using chi-square and Fishers exact tests where applicable after dichotomizing responses into positive responses (Likert 5-7) and negativeneutral responses (Likert 1-4) .	chi-square
	Fishers exact tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
