SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: All volunteers with informed consent documents were from the physical examination population in the physical examination center of Guangdong Provincial Hospital of Chinese Medicine.
IRB: The study was approved by the Ethics Committee of Guangdong Provincial Hospital of Chinese Medicine.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
In the control group, there were 25 healthy people (20 males and 5 females) aged between 24 and 70 years.
Subject Demographics
Age: In the control group, there were 25 healthy people (20 males and 5 females) aged between 24 and 70 years.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
53 We used the Andromeda search engine 54 to search the detected features against the human Swiss-Prot reference proteome from Uniprot (downloaded on 18 March 2019 , 20251 proteins) .	Uniprot		Suggestion: UniProt (RRID:SCR_002380)(link)
The “proteinGroups . txt” file produced by MaxQuant was further analyzed in the R language (R version 3.5.1) .	MaxQuant		Suggestion: MaxQuant (RRID:SCR_014485)(link)
Statistical Analysis A two-sided t-test was performed on the logarithmized LFQ intensities with a p-value cutoff of 0.05 and fold change ≥1.5 . Protein Gene Ontology and Pathway Analysis Cellular component annotation for identified proteins was performed using DAVID (https://david.ncifcrf.gov/) with the GOTERM_CC_DIRECT database.	DAVID		Suggestion: DAVID (RRID:SCR_001881)(link)
Gene Ontology enrichment analysis was performed using STRING (version 11.0 , https://string-db.org/) , an open-source software tool , for general characterization of properties of the proteins in the data set.	STRING		Suggestion: STRING (RRID:SCR_005223)(link)

Statistical Analysis A two-sided t-test was performed on the logarithmized LFQ intensities with a p-value cutoff of 0.05 and fold change ≥1.5 . Protein Gene Ontology and Pathway Analysis Cellular component annotation for identified proteins was performed using DAVID (https://david.ncifcrf.gov/) with the GOTERM_CC_DIRECT database.	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
