SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: All university medical ethical committees approved this study (reference number NL27783.029.09).
Consent: All participants provided written informed consent.
Inclusion and Exclusion Criteria
Further details on the design of the Dutch Diabetes Pearl have been published previously. 22 People were eligible for participation if they were diagnosed with type 2 diabetes and received secondary or tertiary care in one of the academic medical centres of Amsterdam, Utrecht, Nijmegen, Rotterdam, Leiden or Groningen, if they received primary medical care in the area of Hoorn, or if they received primary, secondary or tertiary care in the area of Maastricht.
Attrition
We included 6759 people in the current study, after exclusion of 197 participants whose data regarding medication use were unavailable and 57 participants from Maastricht whose line of care was unavailable.
Sex as a biological variable
2.3 Sociodemographic characteristics Age (years), sex (men/women) and line of care (primary care/academic care) were collected from hospital information systems.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Medication was classified using the Anatomical Therapeutic Chemical (ATC) classification system.	ATC		
2.6 Statistical analysis The statistical analyses were performed with IBM SPSS Statistics Version 22.0 and R Statistical Software Version 3.6.1.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
	R Statistical		Suggestion: R Project for Statistical Computing (RRID:SCR_001905)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
