SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The Seoul National University Hospital (Seoul, South Korea) institutional review board approved this study (IRB no. E-1809-073-973).
Consent: The requirement for written informed consent was waived by the review board because anonymized, de-identified information was used for analysis.
Inclusion and Exclusion Criteria
We excluded individuals with a prior diagnosis of MI or stroke during the 5 years before enrolment (n = 430 621), those with any missing variables (n = 510 925), and those who were overweight or obese (n = 5 384 581).
Attrition
not detected.
Sex as a biological variable
The estimated glomerular filtration rate was calculated using the equation from the Modification of Diet in Renal Disease study, estimated glomerular filtration rate = 175 x serum creatinine-1.154 x age-0.203, and further multiplied by 0.742 for women.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.

Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analyses were conducted using SAS software (Version 9.4 SAS Institute, Cary, NC, USA), and a P-value < 0.05 was considered statistically significant.	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Values were compared using one-way analysis of variance test for continuous variables and the kh 2 test for categorical variables.	analysis of variance test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
