SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Only the patients who expressed interest in participating were approached for consent and enrolled before being seen by their ophthalmologists .
IRB: The study protocol was approved by the Johns Hopkins School of Medicine Institutional Review Board.
Inclusion and Exclusion Criteria
not detected.
Attrition
As we had no idea at the outset what behaviour change might be seen, we added an additional 16 patients to allow for more power.
Sex as a biological variable
not detected.
Subject Demographics
Age: Patients older than 18 years were recruited , consented to participate and enrolled in this study between 1 April and 30 June 2019 .
Randomization
not detected.
Blinding
not detected.
Power Analysis
As we had no idea at the outset what behaviour change might be seen, we added an additional 16 patients to allow for more power.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All study questionnaire responses were entered into REDCap (Research Electronic Data Capture) following the completion of the participant encounter .	REDCap		Suggestion: REDCap (RRID:SCR_003445)(link)
All statistical analyses were performed using STATA V.15	STATA		Suggestion: Stata (RRID:SCR_012763)(link)
(StataCorp LP, College Station, Texas, USA).	StataCorp		Suggestion: Stata, RRID:SCR_012763(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The Fishers exact test was used to test for significant differences in the reported change to clinical approach and communication style according to the severity of anxiety and depression .	Fishers exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
