Document Identifier: **PMC8064634**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: All procedures involving mouse experiments were approved by the ethics committee of RIKEN (MAH21-19-17) and performed in accordance with the institutional and national guidelines.
Euthanasia Agents: Following an interval of 10 min, mice were then anesthetized with pentobarbital or isoflurane and placed onto an IVIS kinetic fluorescence imager (Caliper Life Sciences, USA).
Field Sample Permit: Abdominal (anterior) images of the mouse specimens were then collected as described.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: This solution was then intraperitoneally injected into 5-week-old BALBc-nunu mice (n = 8).
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Cell Line Authentication
not detected.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Experimental Models: Cell Lines			
Cell culture Human cervix epithelial (HeLa) cells were obtained from the RIKEN Cell Bank, which were cultured in DMEM supplemented with 10 heat-inactivated FBS and 1 penicillin-streptomycin.	HeLa		Suggestion: RRID:CVCL_0030(link)
The HeLa-V cell line was created by stable transfection of HeLa cells with firefly luciferase and Venus, which was cultured in DMEM supplemented with 10 FBS, 1 penicillin-streptomycin, and 0.8 Geneticin.	HeLa-V		
HeLa229 cells were serum starved 16 hours before the experiment by replacing its growth media to DMEM only (serum free).	HeLa229		Suggestion: RRID:CVCL_1276(link)
Bioluminescence imaging of mice and tumor burden analysis As a method to monitor tumor formation and growth in living mice, HeLa-Luc cells were stably transfected with a firefly luciferase reporter gene.	HeLa-Luc		Suggestion: (RRID:CVCL_YA88)(link)
Experimental Models: Organisms/Strains			
The treatment group (condition 4) was set up as follows: 5-week-old BALBc-nunu mice (n = 7) were intraperitoneally injected first with HeLa-Luc cells (100,000 cells suspended in 100 ml of HBSS media), followed by an interval of 10 min, a second injection of GArM (3 nmol in 100 ml of 10:90 H2Osaline), another interval of 15 min, and a final injection of cRGD-PE (15 nmol in 100 ml of 5:95 H2Osaline).	BALBc-nunu		
Recombinant DNA			
For the HeLa-Luc stable cell line, a pCAG-Luciferase-IRES2-Puro plasmid vector was used, and puromycin selection (2 mgml) began 2 days after transfection.	pCAG-Luciferase-IRES2-Puro		
For the HeLa-V stable cell line, a pCAG-Luciferase-IRES2-Venus plasmid vector was used, and Geneticin selection (400 mgml) began 2 days after transfection.	pCAG-Luciferase-IRES2-Venus		

Software and Algorithms			
The mice were housed at the RIKEN Center for Life Science Technologies.	RIKEN Center		
Various control groups were also used: condition 1 replaces both GArM and cRGD-PE with equivalent volumes of saline, condition 2 replaces cRGD-PE with an equivalent volume of saline, and condition 3 replaces GArM with an equivalent volume of saline.	GArM		

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
