SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Informed consent was based on written information from the researchers.
Field Sample Permit: The Regional Committee for Medical and Health Research Ethics in Central Norway (ref. no. 2016968) and the Norwegian Data Inspectorate (ref. no. 49571) assessed and approved the study.
IRB: The Regional Committee for Medical and Health Research Ethics in Central Norway (ref. no. 2016968) and the Norwegian Data Inspectorate (ref. no. 49571) assessed and approved the study.
Inclusion and Exclusion Criteria
The inclusion criteria were adult patients living at home, who had a cancer diagnosis and 3 months of experience participating in a videoconference follow-up by oncology nurses through a municipal primary health service.
Attrition
Six patients living in rural area of Central Norway received the possibility to use videoconferencing on tablets during oncology nurses follow-up, as well as to stay in contact with family and peer networks of cancer patients.
Sex as a biological variable
The participants, four women and two men, had different types of cancer, and ranged in age from 49 to 78 years old (mean = 68.5).
Subject Demographics
Age: The participants, four women and two men, had different types of cancer, and ranged in age from 49 to 78 years old (mean = 68.5).
Randomization
not detected.
Blinding
not detected.
Power Analysis

not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
