SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol was approved by the Dokuz Eylul University, Faculty of Medicine, Ethics Committee (Approval date: 11012017-2).
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
Specimens and instruments Of 58 fresh-frozen male sheep lumbar spines, 36 lumbar spines were harvested and prepared to become eligible for biomechanical testing of pullout strength measurement used in this study.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
To assess the pullout strength in a randomized, biomechanical experimental model, six transpedicular screw with different thread patterns manufactured by (TIPSAN Company AS, Izmir, Turkey), were submitted to the pullout strength testing using sheep spine samples.
Blinding
not detected.
Power Analysis
The sample size was six for each group in each test.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis Statistical analysis was performed using the SPSS version 15.0 software (SPSS Inc., Chicago, IL, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
For statistical analysis the Mann Whitney U test was conducted.	Mann Whitney U test
The Mann-Whitney U test was used to compare between study group results.	Mann-Whitney U test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
