SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IACUC: This study was approved by the Committee of Animal Care and Use in Ehime University (No. 08011-10) .
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
Materials and Methods Animals and Experimental Procedure In Experiment 1, 50 1-day-old male layer chickens (White Leghorn, Julia) were purchased from a local hatchery (
Subject Demographics
Age: Materials and Methods Animals and Experimental Procedure In Experiment 1, 50 1-day-old male layer chickens (White Leghorn, Julia) were purchased from a local hatchery (
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis of growth performance was performed by repeated two-way analysis of variance (ANOVA), and other data analysis was performed by one-way ANOVA and Tukeys HSD test for multiple comparisons ($P<0.05$) using the General Linear Model Procedures of SAS (SASSTAT version 9.4) (SAS Institute, 2012).	SAS Institute		Suggestion: Statistical Analysis System, RRID:SCR_008567(link)

	ANOVA
	Tukeys HSD test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
