Document Identifier: **PMC8082115**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Healthy volunteers had no past medical history of cholestatic or liver diseases and were classified according to American Society of Anesthesiology (ASA) physical status classification system as ASA I or II. Study Approval The protocol was approved by the Ethical Committee of the Jena University Hospital.
Consent: All patients or their legal representatives and healthy volunteers provided written informed consent before inclusion in the study.
Inclusion and Exclusion Criteria
Inclusion criteria were as follows: (1) age >=18 years (2) plasma disappearance rate of indocyanine green <10minute (3) plasma bilirubin level >170 mmolL and (4) international normalized ratio >1.5 andor overt hepatic encephalopathy (grades II-IV according to West Haven Criteria).
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Inclusion criteria were as follows: (1) age >=18 years (2) plasma disappearance rate of indocyanine green <10minute (3) plasma bilirubin level >170 mmolL and (4) international normalized ratio >1.5 andor overt hepatic encephalopathy (grades II-IV according to West Haven Criteria).
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

Each measurement was performed in triplicate and repeated at least 2 times.
Number: Each measurement was performed in triplicate and repeated at least 2 times.
Cell Line Authentication
not detected.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Experimental Models: Cell Lines			
17 HEK293T cells were transiently transfected with mini-Gs-Venus and either TGR5-Nluc or ADRB2-Nluc in a 7:3 ratio using Effectene Transfection Reagent (Qiagen, Venlo, The Netherlands) according to the manufacturers instructions.	HEK293T		Suggestion: RRID:CVCL_0063(link)
THP-1 cells (TIB-202 ATCC, Manassas, VA) were stably transduced with both vectors and sorted for equal GFP expression.	THP-1		Suggestion: RRID:CVCL_0006(link)
Recombinant DNA			
NanoBRET TGR5 plasmid was purchased from Sino Biological (Beijing, China).	TGR5		
17 HEK293T cells were transiently transfected with mini-Gs-Venus and either TGR5-Nluc or ADRB2-Nluc in a 7:3 ratio using Effectene Transfection Reagent (Qiagen, Venlo, The Netherlands) according to the manufacturers instructions.	TGR5-Nluc		
pLV-C-GFPSpark (EV, LVCV-01) and pLV-G-protein-coupled bile acid receptor 1-GFPSpark (TGR5 vector, HG11472-ACGLN) were purchased from Sino Biological, Inc.	pLV-C-GFPSpark		
Software and Algorithms			
Bile Acids Total bile acid levels in serum were quantified by an enzymatic colorimetric kit (Abbott Laboratories, Abbott Park, IL).	Abbott Laboratories		
Table 6 Primers Used for Quantitative Real-Time Polymerase Chain Reaction Gene name Gene symbol Gene ID Forward primer, 5 to 3 Reverse primer, 5 to 3 Target gene TGR5 GPBAR1 151306 CTCCCAGGCTATCTTCCCAG ACAGAGAGGAAGGCAGCAG Housekeeping genes Calnexin CANX 821 AAGGTTACTTACAAAGCTCC ACTCCTTCATTTCCTCTACC Ubiquitin C UBC 7316 TCGCAGCCGGGATTTGG TCACGAAGATCTGCATTGTCAAG Proteasome 20S subunit b3 PSMB3 5691	GraphPad Prism		Suggestion: GraphPad Prism (RRID:SCR_002798)(link)
	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

GTCCACATCATCGAGAAGGACA GGCTCTGGGAACAGGGTTAG Statistics Statistical analysis was conducted as indicated in the respective figure legends using GraphPad Prism (La Jolla, CA) or SPSS (IBM, Chicago, IL).			

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
