SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The Institutional Review Board approved the study (H1RI-23-Apr18-01).
Inclusion and Exclusion Criteria
Inclusion criteria were: being more than 18 years of age, Saudi nationals.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: All patients who underwent an EGD with an indication of UGIB or it was described that the patient presented with hematemesis (including coffee ground vomiting), melena, or both as well as those who had hematochezia, from January 2004 to December 2016 (13 years), were included in the study.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
If hypothesis testing was used, Pearsons Chi-square t-test and, where appropriate, Fishers exact tests were used.	Chi-square t-test
	Fishers exact tests
A one-way analysis of variance to test for differences among groups when comparing more than one group was performed when appropriate.	analysis of variance

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
