SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol was reviewed and approved by the institutional review boards of each participating center.
Consent: Informed written consent for this trial was obtained from patients according to the rules of the participating centers Institutional Review Board.
Inclusion and Exclusion Criteria
Materials and methods Patients Eligible patients were at least 18 y of age with histologically con#rmed non-muscle invasive urothelial carcinoma of intermediate or high risk who had not received prior treatment with BCG (ie, BCG-naïve) (Figure 1), NCT02138734.
Attrition
No participants had tumor lymph node invasion or metastases.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.	
Protocol Information	
Identifiers: Materials and methods Patients Eligible patients were at least 18 y of age with histologically con#rmed non-muscle invasive urothelial carcinoma of intermediate or high risk who had not received prior treatment with BCG (ie, BCG-naïve) (Figure 1), NCT02138734.	NCT02138734

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
