SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study received ethical approval from the Ethics Committee of the hospital and conformed to the provisions of the Declaration of Helsinki.
Inclusion and Exclusion Criteria
Exclusion criteria were: malignant disease, serious cardiovascular disease in the previous 6 months, other contraindications for metabolic surgery, drug or alcohol abuse, uncontrolled psychiatric illness, and pregnancy or planned pregnancy.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Methods Patients Patients aged 16–65 years with T2DM and a BMI ≥ 27.5 kg/m2 were included in the present study.
Weight: Methods Patients Patients aged 16–65 years with T2DM and a BMI ≥ 27.5 kg/m2 were included in the present study.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Analysis SPSS version 18.0 software (IBM Corp., Armonk, NY, USA) was used by an independent statistician to analyze the data.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Primary endpoint at 1 year, remission of diabetes, and medication usage were assessed by the Chi-squared test.	Chi-squared test
Differences between baseline and post-intervention within each treatment group were evaluated using the paired Student's t-test.	t-test
Differences between the intervention groups after adjusting for baseline values were evaluated by analysis of covariance.	analysis of covariance

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
