Document Identifier: **PMC8100015**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical approval for the study was obtained by the Institutional Review Board of the Shahid Beheshti University of Medical Sciences (approval number: IR.SBMU.UNRC . REC.1398.15) .
Consent: The requirement for informed consent was waived owing to the retrospective approach .
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
A bootstrapping technique was applied by using 1,000 random data sets generated from the original data.
Blinding
The assessors of outcome were blinded to the study covariates .
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Antibodies			
All cases with an intensity score >=2 and tumor positivity >=20 were considered positive, as previously defined 12 The following primary antibodies were selected for use in this study, based on the IHC markers introduced by Dadhania et al. 12: KRT56 (MAD-000651QD) and KRT14 (MAD-005103QD) as basal markers KRT20 (MAD-005105QD) and GATA3 (MAD-000632QD) as luminal markers and desmin (MAD-001011QD) as a p53-like marker.	MAD-000651QD		
	KRT14		
	GATA3		
To determine two additional rare phenotypes, i.e., mesenchymal-like and small-cellneuroendocrine-like 16, antibodies against vimentin (MAD-000326QD) and CDH1 (MAD-000761QD) were also used.	vimentin (MAD-000326QD)		
	CDH1		
Software and Algorithms			
The statistical analyses were performed by using IBM SPSS, version 23 (IBM Corp., Armonk, NY, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
A log-rank test was used to compare OS between the patient groups.	log-rank test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
