SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Informed consent was provided by all participants and participation in the study was voluntary and anonymous.
IRB: Ethical approval for the study was received from the research team's university's ethics committee, and complied with the Declaration of Helsinki (IRB approval number=2019/7).
Inclusion and Exclusion Criteria
Those who indicated that they have never watched a mukbang before were excluded from the study (n=387).
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Of these, 217 were mukbang watchers (watched mukbang at least once before) whose ages ranged between 18 and 33 years (Mage=20.58 years, SDage=1.88; 63% female).
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The CRS coefficient was good in the present study (α=0.74) Statistical analysis All statistical analyses were carried out using SPSS 23 (IBM Corp., Armonk, NY, USA) and AMOS 23 (IBM Corp.). First, CFA was used to evaluate the factor structure of the PYUS.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Following this, Pearson's correlation and t-tests were applied to examine the correlation coefficients between PYU, PMW, depression, and loneliness, and significance of the score differences between genders.	Pearson's correlation
	t-tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
