SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical approval was granted by the Institutional Review Board (IRB) of Princess Nourah bint Abdulrahman University (PNU) (H-01-R-059).
Consent: The selected colleges were contacted prior to the distribution of the questionnaires and consent was given to approach the students.
Inclusion and Exclusion Criteria
Participants were included if they were students at one of the selected colleges, between the ages of 18 and 30 years and are able to read and speak Arabic.
Attrition
not detected.
Sex as a biological variable
The content validity was also assessed by this committee.17 The Arabic PIDAQ version was then pilot tested on a convenience sample of 20 female volunteers, aged 18–25 years, recruited from Princess Nourah bint Abdulrahman University, Riyadh, Saudi Arabia.
Subject Demographics
Age: Participants were included if they were students at one of the selected colleges, between the ages of 18 and 30 years and are able to read and speak Arabic.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The Statistical Package for the Social Sciences version 14.0 for Windows (SPSS Inc, Chicago, Illinois, USA) was used for the data analysis.	Statistical Package for the Social Sciences		Suggestion: SPSS, RRID:SCR_002865(link)
	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Bivariate analysis (ANOVA) was used to investigate the impact of the following factors on the mean PIDAQ scores; University affiliation, field of study, level of study (junior, mid-level, senior), and family income.	ANOVA
In addition, Tukey's test was used for intergroup comparisons and Multiple linear regression analysis was used to test the influence of the aforementioned sociodemographic variables on the PIDAQ scale and subscales.	Tukey's test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
