SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Methods This cross-sectional survey study was reviewed by Mayo Clinic Institutional Review Board (IRB) and determined to be exempt under section 45 CFR 46.101, item 2.
Consent: Study Population and Survey Administration Inclusion criteria for this study comprised of being a HCP whose primary assignment was within our Institution GIM Division, being at least 18 years of age, and having the ability to provide passive consent and complete an online survey.
Inclusion and Exclusion Criteria
Study Population and Survey Administration Inclusion criteria for this study comprised of being a HCP whose primary assignment was within our Institution GIM Division, being at least 18 years of age, and having the ability to provide passive consent and complete an online survey.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Study Population and Survey Administration Inclusion criteria for this study comprised of being a HCP whose primary assignment was within our Institution GIM Division, being at least 18 years of age, and having the ability to provide passive consent and complete an online survey.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
