SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Our retrospective study was approved by Hanoi Medical University Institutional Ethical Review Board (No NCS10BB-HDDD).
Inclusion and Exclusion Criteria
We excluded patients with recurrent pancreatic cancer or without relevant medical record information (status of each LN stations metastasis, complications).
Attrition
From the clinical database, 97 patients who underwent pancreaticoduodenectomy and para-aortic lymph node sampling at VietDuc University hospital from January 2013 to August 2020 were recruited in the study.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
With a power of 0.8 and type I error of 5, at least 80 fatal events are required to be significant 5,15.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
The analyses were performed using SPSS 25.0 64 bit for Windows (IBM Corporation, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
We used students t-test for continuous variables, non-parametric test for median parameter, and kh2 test or Fishers exact test for categorical variables.	t-test
	kh2 test
	Fishers exact test
OS and survival probabilities were calculated by the Kaplan-Meier curves using the log-rank test.	log-rank test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
