SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study was approved by the Tel Aviv Sourasky Medical Center Institutional Review Board (Helsinki Committee), and was conducted in accordance with the Declaration of Helsinki.
Consent: Thus, we received an exemption from signing a consent form for participating in the study.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Methods Patient Population and Study Design Six-hundred and thirty patients aged ≥18 years old and diagnosed with non-NHL, HL, CLL, and MM actively treated or followed in the outpatient services at the TASMC between March 25, and May 3, 2020 (the first COVID-19 outbreak in Israel) were invited to take part in the current non-interventional clinical study.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
SPSS software was used for all statistical analyses (IBM SPSS Statistics for Windows, version 25, IBM corp.,	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Categorical variables were compared between the two time points with the McNemar test, while continuous and ordinal variables were compared with the Wilcoxon signed-rank test.	McNemar test
	Wilcoxon signed-rank test
The Mann–Whitney test was applied to compare continuous and ordinal variables between groups of patients.	Mann–Whitney test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
