Document Identifier: **PMC8132851**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was approved from the Subcommittee of Health Research Ethics, Deanship of Scientific Research, Qassim University.
Consent: An online consent form written in Arabic was included in the questionnaire that was advised to be completed first.
Inclusion and Exclusion Criteria
The final number of recruited parents was 385 after exclusion of incomplete questionnaires.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
The sample size was calculated using the proportion formula: n = z2p (1-p)d2 with 95 confidence level and 5 margin of error.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All data analyses were analyzed using the Statistical Package for Social Sciences, version 21 (SPSS, Armonk, NY: IBM Corp, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The statistical association between knowledge and practices among the socio-demographic characteristics of parents was conducted using the Mann-Whitney U test, (skewed data).	Mann-Whitney U test
Statistical collinearity was also conducted using the Shapiro Wilk test.	Wilk test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
