Document Identifier: **PMC8133602**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
Three biological replicates for each sample and three technical replicates for each biological replicate were used.
Type: Three biological replicates for each sample and three technical replicates for each biological replicate were used.

Number: Three biological replicates for each sample and three technical replicates for each biological replicate were used.	
Data Information	
Availability: The SRA metadata was deposited to National Center for Biotechnology Information (NCBI) under the accession number PRJNA649443.	
Identifiers: The SRA metadata was deposited to National Center for Biotechnology Information (NCBI) under the accession number PRJNA649443.	PRJNA649443

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Total RNA was extracted using the Tri-Reagent (Gibco-BRL Life Technologies) and treated with Turbo DNase I (Ambion).	Gibco-BRL		
The trimmed reads were then mapped to the M. truncatula genome version 4.0 using TopHat version 2.1.1 (http:ccb.jhu.edusoftwaretophatindex.shtml).	TopHat		Suggestion: TopHat, RRID:SCR_013035(link)
The mapped reads were then assembled into transcripts and quantified using Cufflinks version 2.2.1 (http:cole-trapnell-lab.github.iocufflinks).	Cufflinks		Suggestion: Cufflinks (RRID:SCR_014597)(link)
Differential expression testing was performed with Cuffdiff, with q-value (adjusted p-value) <0.05, which is part of the Cufflinks software package.	Cuffdiff		Suggestion: Cuffdiff (RRID:SCR_001647)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
