SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Informed consent was obtained from the participants prior to the study.
Inclusion and Exclusion Criteria
not detected.
Attrition
Seven participants were conveniently chosen to provide an insight into the integration of oral health into the national health schemes.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Figure 2 Sociogram depicting good group dynamics in the focus group discussion Data management and processing The quantitative information was entered in Microsoft Excel 2007 and analyzed through SPSS version 23.	Microsoft Excel		Suggestion: Microsoft Excel, RRID:SCR_016137(link)
	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
The translated transcripts were coded and analyzed using the HyperRESEARCH 4.0.1 software systematically to identify the themes.	HyperRESEARCH		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
For nominal data chi-square was conducted and for continuous data t-test was conducted.	t-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
