SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This study was conducted in accordance with the Declaration of Helsinki and approved by the Ethics Committee of Beijing Friendship Hospital of China, Capital Medical University
Consent: Written informed consent was obtained from all participants .
Inclusion and Exclusion Criteria
not detected.
Attrition
Tissue differentiation: 58 patients had highly differentiated adenocarcinoma, 31 patients had highly to moderately differentiated adenocarcinoma, and 18 patients had moderately differentiated adenocarcinoma.
Sex as a biological variable
Among these patients, 79 were male and 28 were female, and the ages ranged between 38-82 years old, with an average age of 63 +- 8.6 years old.
Subject Demographics
Age: Among these patients, 79 were male and 28 were female, and the ages ranged between 38-82 years old, with an average age of 63 +- 8.6 years old.
Randomization
Five areas were randomly selected for each section , and the expression in 1000 tumor cells was evaluated by high power microscopy (400x) .
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
6 Statistical Analysis Data were statistically analyzed using statistical software SPSS 22.0.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Count data were expressed in percentage () and compared between groups using X 2-test and regression analysis.	X 2-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
