SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Field Sample Permit: This study was conducted in accordance with the Declaration of Helsinki, and was approved by the research ethics committees of each institution.
IRB: This study was conducted in accordance with the Declaration of Helsinki, and was approved by the research ethics committees of each institution.
Consent: Each participant signed a written informed consent form before enrollment, and a parent or legal guardian of patients under 18 years of age provided informed consent.
Inclusion and Exclusion Criteria
M3v type of APL was excluded from our study.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Each participant signed a written informed consent form before enrollment, and a parent or legal guardian of patients under 18 years of age provided informed consent.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All statistical analyses were performed using SPSS version 24.0, and graphs were drawn with GraphPad Prism version 8.0, and $p<0.05$ was considered to indicate statistical significance.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)
	GraphPad Prism		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical Analysis The chi-square test or Fishers exact test was used to compare categorical variables.	chi-square test
	Fishers exact test
For continuous variables, the Mann-Whitney U-test was used to compare the characteristics of the baseline data for each group.	Mann-Whitney U-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
