Document Identifier: **PMC8164560**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Material and Methods Study design This retrospective study was approved by our institutional review board; prior informed patient consent was waived.
Consent: Material and Methods Study design This retrospective study was approved by our institutional review board; prior informed patient consent was waived.
Inclusion and Exclusion Criteria
Included for analysis were patients who had CBCT during TACE and dynamic contrast-enhanced CT and/or Gd-EOB-DTPA-enhanced MRI two months before TACE.
Attrition
not detected.
Sex as a biological variable
Sex (male/female) 20/10 Mean age ± SD , years 75 ± 9 Etiology (HBV/HCV/alcohol/NBNC) 4/14/5/7
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical analysis The Chi-square test was used to determine inter-group differences in HCC detectability on DSA images, Fisher's exact test to assess differences in HCC and feeding artery detectability on CBCT-CA and CBCT-CHA images, and the Welch t-test to determine differences in the TLC.	Chi-square test
	Fisher's exact test
	Welch t-test
To determine differences in the branch-order number on CBCT scans, we applied the Mann-Whitney U-test.	Mann-Whitney U-test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
