Document Identifier: **PMC8166766**

SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Institutional Review Board approval was obtained prior to conduction of this study.
Inclusion and Exclusion Criteria
Male patients, patients less than 18 years old at the time of index unplanned encounter, and patients with breast cancer or primary peritoneal cancer managed by a medical or surgical oncologist were excluded.
Attrition
not detected.
Sex as a biological variable
Male patients, patients less than 18 years old at the time of index unplanned encounter, and patients with breast cancer or primary peritoneal cancer managed by a medical or surgical oncologist were excluded.
Subject Demographics
Age: Male patients, patients less than 18 years old at the time of index unplanned encounter, and patients with breast cancer or primary peritoneal cancer managed by a medical or surgical oncologist were excluded.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All identifiers stored in REDCap were removed prior to data analysis and publication.	REDCap		Suggestion: REDCap (RRID:SCR_003445)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Chi-squared and Fishers exact tests were used to test for differences between super-utilizers and non-super-utilizers for categorical variables, and Wilcoxon rank-sum tests were used to compare medians between groups for continuous variables.	Chi-squared
	Fishers exact tests
	Wilcoxon rank-sum tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
