SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: A written informed consent was obtained from each patient.
IRB: The study protocol was approved by the Kartal Kosuyolu High Specialization Education and Research Hospital Ethics Committee (No: 2019.7723-239).
Inclusion and Exclusion Criteria
Donor selection criteria were as follows: age <55 years, blood group compatibility, intubation period of less than five days, not being a heavy smoker (20 pack-years), lack of Gram-negative or fungal growth in cultures, a partial oxygen pressure (PaO2)fraction of inspired oxygen (FiO2) PF ratio of >=250, positive end-expiratory pressure (PEEP) of 5 cmH2O, lack of extensive infiltration, pneumothorax or trauma findings (contusion) on chest X-ray, and lack of a history of chronic lung disease.
Attrition
not detected.
Sex as a biological variable
A total of 53 patients (43 males, 10 females mean age: 46.1+-13 years range, 14 to 64 years) undergoing LTx were included.
Subject Demographics
Age: A total of 53 patients (43 males, 10 females mean age: 46.1+-13 years range, 14 to 64 years) undergoing LTx were included.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication

not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis Statistical analysis was performed using the IBM SPSS version 26.0 software (IBM Corp., Armonk, NY, USA).	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
