SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Data Collection Instrument and Procedure Questionnaires with informed consent and having four parts, i.e., socio-demographic, knowledge, attitudes, and perceptions were used for collecting data.
Inclusion and Exclusion Criteria
Incomplete surveys were excluded.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Inclusion and Exclusion Criteria Being an Ethiopian resident, age greater than 18 years old, and having good internet access were our inclusion criteria.
Randomization
not detected.
Blinding
not detected.
Power Analysis
However, our sample size was greater than this estimate.
Replication
not required.
Cell Line Authentication
Authentication: To make sure the questions are externally and internally consistent we validated through pilot testing and Cronbachs Alpha test.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
After downloading the collected data from Google forms, it was cleaned, sorted, edited, and coded in Excel.	Excel		
Then for statistical analysis, it was imported into SPSS software.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Then after reporting frequencies, percentages, standard deviations, and means, chi-square tests were conducted.	chi-square tests

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
