SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Materials and Methods Patient Population This retrospective study was approved by the institutional review board, with waiver of informed consent.
Consent: Materials and Methods Patient Population This retrospective study was approved by the institutional review board, with waiver of informed consent.
Inclusion and Exclusion Criteria
Inclusion criteria were the following: patients age >18 years, liver fat content <5.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Inclusion criteria were the following: patients age >18 years, liver fat content <5.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis was performed using Matlab R2020a (The MathWorks Inc., Natick, MA, USA).	Matlab		Suggestion: MATLAB (RRID:SCR_001622)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The comparison among the mean values of VIC extracted from ROIs on the non-enhanced scan and on the 3 different post-contrast scans was performed using the Friedmans test followed by Bonferroni-adjusted Wilcoxon signed-rank test for post-hoc analysis, carrying out a separate analysis of the values obtained in the left and right lobes.	Friedmans test
	Wilcoxon signed-rank test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
