SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: The study protocol was approved by the institutional review boards of the 6 field centers .
Consent: Written informed consent was obtained from each participant at study entry .
Inclusion and Exclusion Criteria
Study Population Of the 6814 MESA participants , a total of 87 were excluded from the present analysis: 5 participants with baseline events , 55 with missing data on relevant covariates , and 27 without follow-up information .
Attrition
not detected.
Sex as a biological variable
Each of the 6 field centers recruited approximately the same number of men and women , from at least 2 or more of the racialethnic groups included , with sampling designed to achieve a community-representative sample.
Subject Demographics
Age: County , MD St . Paul , MN Chicago , IL and Los Angeles County , CA) a total 6814 participants aged between 45 to 84 years were recruited between 2000 and 2002 .
Randomization
not detected.
Blinding
21 The images were interpreted in a blinded fashion at the central MESA CT reading center at Harbor UCLA .
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Methods Data Sharing Qualified researchers may request source data from MESA (https:www.mesa-nhlbi.org) and details about the specific may request the study protocol from Amgen, subject to an approved data sharing agreement clinical studies (http:www.amgen.comdatasharing).	Amgen		

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
