SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Standard Protocol Approvals Independent review board approval was obtained prior to all study-related activity from the Ethics Committee of Tubingen University (protocol no. 2702015BO1).
Inclusion and Exclusion Criteria
Patients being treated with other anticoagulants (VKA within 14 days, other DOAC within 7 days, low-molecular-weight heparins LMWHs within 24 hours, or unfractionated heparin UFH within 12 hours prior to enrolment), spontaneously altered coagulation (INR >1.2, activated partial thromboplastin time >37 seconds), or known coagulopathy were excluded.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
Setting and Eligibility The study was single-center prospective diagnostic study with blinded outcome assessment.
Power Analysis
not detected.
Replication
not required.

Protocol Information	
Identifiers: The trial was registered at Clinicaltrials.gov under the unique identifier number NCT02825394.	NCT02825394 Warning: study registration date June 28, 2016 is after study start date September 2015

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
14 AUROCs were compared using the VassarStats Clinical Calculator according to suggestions made by Hanley and McNeil . 15 16 SPSS version 24 (IBM , Armonk	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical Analyses Pearsons correlation coefficient was used to quantify the strength of correlation between coagulation assay test results and UPLC-MSMS.	Pearsons correlation

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
