SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: The requirement for informed consent was waived due to the retrospective nature of the study.
IRB: This study was approved by Zekai Tahir Burak Women Health Training and Research Hospital Clinical Research Ethics Committee (approval number: 152018, date: 06.03.2018).
Inclusion and Exclusion Criteria
Patients with a history of additional chronic systemic disease or chronic drug use for reasons other than CAH were excluded from the study.
Attrition
not detected.
Sex as a biological variable
Methods This study included 46,XX patients with CAH raised as males (21 hydroxylase and 11 beta hydroxylase-deficient CAH patients analyzed as a single group given their similar clinical characteristics).
Subject Demographics
Age: not detected.
Weight: not detected.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical Analysis Statistical analysis was done using Statistical Package for the Social Sciences, version 22 (IBM Inc., Armonk, NY, USA).	Statistical Package for the Social Sciences		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
For evaluation of the normality distribution of the data, the Shapiro-Wilk test was used.	Shapiro-Wilk test
The statistical significance was investigated using t-test for numerical variables, Mann-Whitney U test for non-normal distributions, cross table, Pearson chi-square test and Fishers exact test for categorical variables.	t-test
	Mann-Whitney U test
	Pearson chi-square test
	Fishers exact test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
