SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: This retrospective study was approved by the institutional review board, and the need for informed consent from subjects was waived because of the retrospective design of the study.
Consent: This retrospective study was approved by the institutional review board, and the need for informed consent from subjects was waived because of the retrospective design of the study.
Inclusion and Exclusion Criteria
not detected.
Attrition
In pathological classification, 24 patients were plasma cell type, eight were hyaline vascular type and three were the mixed type.
Sex as a biological variable
Methods Patients We retrospectively reviewed 35 patients (26 men and nine women mean age: 43.1 +- 15.5 years) with MCD who underwent 18F-FDG PETCT between July 2012 and July 2020 in our hospital.
Subject Demographics
Age: Methods Patients We retrospectively reviewed 35 patients (26 men and nine women mean age: 43.1 +- 15.5 years) with MCD who underwent 18F-FDG PETCT between July 2012 and July 2020 in our hospital.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis Descriptive statistics were analyzed using SPSS (IBM SPSS Statistics for Windows, Version 21.0.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
