SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Ethical Consideration The ethical clearance was secured from the Internal review board of Assosa University on September 62020 with Ref.
Consent: Study participants were asked their informed consent before asking for any information.
Inclusion and Exclusion Criteria
Inclusion Criteria and Exclusion Criteria Inclusion Criteria Children with their mother or caretaker living in Assosa town for at least 12 months The inclusion criteria were all mothers or caregivers who had a child aged from 12 to 23 months.
Attrition
No person was obligated to participate in the study without his or her consent.
Sex as a biological variable
Women of childbearing age (15-49) were 7867 and a total of 5291 were children under 5 years of age.
Subject Demographics
Age: Women of childbearing age (15-49) were 7867 and a total of 5291 were children under 5 years of age.
Randomization
Source Population All households which have children 12 to 23 months who were living in Assosa Zone, Assosa woreda Town. Study Population The study population was children from 12 to 23 months of age from five randomly selected kebeles in Assosa town.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Data entry, cleaning, coding, and analysing were performed by using SPSS version 22 statistical software.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
