SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: Study participants This prospective study from October 2014 to April 2016 was approved by the Institutional Review Board at our hospital.
Consent: Informed consent was obtained from each participant after a detailed explanation of the study.
Inclusion and Exclusion Criteria
The inclusion criteria were (1) female gender (2) T-score <=-2.5 using DXA (3) age from 50 to 80 years and (4) naive to osteoporosis medication.
Attrition
not detected.
Sex as a biological variable
The inclusion criteria were (1) female gender (2) T-score <=-2.5 using DXA (3) age from 50 to 80 years and (4) naive to osteoporosis medication.
Subject Demographics
Age: The inclusion criteria were (1) female gender (2) T-score <=-2.5 using DXA (3) age from 50 to 80 years and (4) naive to osteoporosis medication.
Randomization
Participants were randomly assigned to the alendronate or bazedoxifene group by block randomization method.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
All statistical analyses were performed using SPSS version 20.0 (IBM Corp., Armonk, NY, USA), and statistical significance was set at P less than 0.05.	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
The Kolmogorov-Smirnov test was used for the determination of data normality.	Kolmogorov-Smirnov test
Continuous variables were compared between the alendronate and bazedoxifene groups using a Mann-Whitney test, and comparisons of variables between time points within each group were performed using a Wilcoxon sign rank or Friedman test according to the number of comparisons.	Mann-Whitney test
	Wilcoxon sign rank or Friedman test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
