SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
Consent: Written consent was obtained from all the participants of the study.
IRB: Ethical approval and Patient consent Ethical approval for conducting the research was obtained from by Departmental Ethical Committee, Department of Home Science, University of Rajasthan, Jaipur.
Inclusion and Exclusion Criteria
Based on the exclusion and inclusion criteria of the study Table 1 and their willingness to participate in the study, patients were recruited for the intervention trial of 3 months.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: Table 1 Inclusion and exclusion criteria of the study Inclusion criteria Exclusion criteria Residents of Jaipur City Pregnancy Age 30-60 years Elderly (>60 years) CNMP >3 months Use of vitamin D or calcium supplements in last 4 months Patients with serum haemoglobin >=9 gdl Patients suffering from anaemia (haemoglobin <9 gdl).
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Data Information
Availability: A copy of the same has been uploaded on the journals site.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
Statistical analysis Data were analyzed by the Statistical Package for the Social Sciences (SPSS) version 16.0, software for Windows (SPSS, Chicago, Illinois, USA).	Statistical Package for the Social Sciences		Suggestion: SPSS, RRID:SCR_002865(link)
	SPSS		Suggestion: SPSS, RRID:SCR_002865(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Chi-square test and Spearmans rho correlation coefficient were performed where appropriate.	Chi-square test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
