SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: 6 Each participating site obtained approval from their designated research Ethics committees: The University of California at San Diego Human Research Protection Program (approval no. 171749X), the Research Ethics Committee of the University of Sassari, Italy (approval no. 2424CE), the Ethics Committee of Health Department and Social Services and Equity of Spain (approval no. CAC-HCV-2016-01).
Consent: For this observational retrospective study, all ethics committed waived the requirement for written informed consent as it was a retrospective review of existing medical records.
Inclusion and Exclusion Criteria
not detected.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: We included PWH who were 18 years of age or older with a detectable HCV viral load and a Child-Turcotte-Pugh (CPT) score B or higher treated for HCV between January 2014 and July 2018.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
6 Each participating site obtained approval from their designated research Ethics committees: The University of California at San Diego Human Research Protection Program (approval no. 171749X), the Research Ethics Committee of the University of Sassari, Italy (approval no. 2424CE), the Ethics Committee of Health Department and Social Services and Equity of Spain (approval no. CAC-HCV-2016-01).	Human Research Protection Program		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
We used kh2 test for comparison of categorical variables and the Wilcoxon rank-sum test for numerical variables.	Wilcoxon rank-sum test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.
