SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
n describes the number of biological replicates in each figure legend.
Type: n describes the number of biological replicates in each figure legend.
Number: Statistical analyses The values reported in each graph represent averages of at least three independent experiments.

Data Information	
Identifiers: Nuclear and cytoplasmic fractionation Cellular fractionation of S2 cells was performed as described in our previous works (35,37,38).	35,37,38

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Antibodies			
Coverslips (cell side up) were incubated with an antibody against gawky (anti1)*, MTF-1**, or FLAG-tagged protein (Beyotime, AF519) for 12 h at 4degC followed by incubating with a fluorescence secondary antibody (Abcam, ab150116 or ab150077) at room temperature for 2 h.	anti1)*		
Samples were then precleared and immunoprecipitated with Protein A+G Agarose beads (Beyotime, P2055-50) bound to an antibody against gawky (anti1), MTF1, FLAG (Beyotime, AF519) or HA (Beyotime, AF0039) in the presence of 1x Protease Inhibitor Cocktail (Beyotime, P1045) for 8 h at 4degC.	MTF1		
	FLAG		
	HA		
These antibodies were used: anti-HDAC1 (Abcam, ab1767, 1:1000 dilution), anti-a-Tubulin (Sigma, T6074, 1:10 000 dilution), anti-Lam (Beyotime, AF5222, 1:300 dilution), anti-FLAG (Beyotime, AF519, 1:1000 dilution), anti-HA (Beyotime, AF0039, 1:1000 dilution), anti-gawky (anti1, 1:250 dilution anti2*, 1:250 dilution), and anti-MTF-1 (1: 500 dilution).	anti-HDAC1		
	ab1767		
	anti-a-Tubulin		
	T6074		
	anti-Lam (Beyotime, AF5222		
	AF519		
	AF0039		
	anti-gawky		
	anti1		
	anti2*		
	anti-MTF-1		
Recombinant DNA			
Plasmids and stable cell line construction Plasmid constructs were generated by inserting the indicated sequences into a pMK33pMtHy-based vector (https:www.addgene.org69911) as previously described (35,37-40).	pMK33pMtHy-based		
Software and Algorithms			
The intensity of the fluorescence signal was analyzed using Image J software.	Image J		Suggestion: ImageJ, RRID:SCR_003070(link)

Line profiles were analyzed using Image-Pro Plus 6.0 software, and the intensity of the nuclear fluorescence signal was analyzed using Image J software according to refs (43,44).	Image-Pro Plus		

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Statistical significance for comparisons of means was assessed by Students t-test.	t-test
Unresolved RRIDs	
Plasmids and stable cell line construction Plasmid constructs were generated by inserting the indicated sequences into a pMK33pMtHy-based vector (https:www.addgene.org69911) as previously described (35,37-40).	addgene.org69911

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
