SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
not required.
Inclusion and Exclusion Criteria
not required.
Attrition
not required.
Sex as a biological variable
not required.
Subject Demographics
Age: not required.
Weight: not required.
Randomization
not detected.
Blinding
not detected.
Power Analysis
not detected.
Replication
Apo , holo and holo + ATP systems were simulated in triplicate.
Number: Apo , holo and holo + ATP systems were simulated in triplicate.
Data Information

Identifiers: Simulations were performed using the AMBER18 package 33 and the Amber ff99SB-ILDN force field 34 for the protein, whereas the ligands (A-769662, SC4) were parameterized using the GAFF 35 force field in conjunction with restrained electrostatic potential-fitted (RESP) partial atomic charges derived from B3LYP6-31G(d) calculations 36.	B3LYP6-31G(d

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
ED analysis was done for 25,000 snapshots from the last 500 ns of each simulation , taking into account only the backbone atoms and the calculations were performed with PCAsuite program (available at http:www.mmb.irbbarcelona.orgsoftwarepcasuitepcasuite.html) , which is integrated in the pyPCcazip program , a suite of tools for compression and analysis of molecular simulations 40 .	pyPCcazip		Suggestion: pyPCcazip (RRID:SCR_024423)(link)
This analysis was performed using the module available in AMBER package.	AMBER		Suggestion: AMBER (RRID:SCR_016151)(link)

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
