SciScore Report

Below you will find your SciScore report containing three tables. Your score is calculated based on adherence to scientific rigor criteria (Table 1) and identification of key biological resources (Table 2). Table 3 contains statistical tests and oligonucleotides but is not scored. If SciScore makes any mistakes, please contact us to help us learn and improve.

Table 1: Rigor Adherence Table

Ethics
IRB: All participating sites have approval from their institutional review board before submission of any data to the registry database.
Inclusion and Exclusion Criteria
We excluded patients with PSA > 20 ng/mL, age > 80 years, patients who received adjuvant ADT, patients with clinical stage T4 disease, patients with a positive bone scan, patients who underwent salvage or focal cryoablation of the prostate and patients who underwent hemi-ablation and focal ablation of the prostate.
Attrition
not detected.
Sex as a biological variable
not detected.
Subject Demographics
Age: We excluded patients with PSA > 20 ng/mL, age > 80 years, patients who received adjuvant ADT, patients with clinical stage T4 disease, patients with a positive bone scan, patients who underwent salvage or focal cryoablation of the prostate and patients who underwent hemi-ablation and focal ablation of the prostate.
Randomization
The COLD registry is supervised by a scientific board of urologists, and an independent audit of scientific data is conducted yearly at randomly chosen centers to ensure the quality and accuracy of data.
Blinding
not detected.
Power Analysis
not detected.
Replication
not required.

Table 2: Key Resources Table

Your Sentences	REAGENT or RESOURCE	SOURCE	IDENTIFIER
Software and Algorithms			
11] 2.3 Statistical analysis R 3.5.1 for RStudio version 1.1.456 (Boston, MA) was used for statistical analyses.	RStudio		Suggestion: RStudio (RRID:SCR_000432)(link)

Other Entities Detected

Your Sentences	Recognized Entity
Statistical Tests	
Associations among type of probes were assessed using a chi-square test or Mann-Whitney U test where appropriate.	chi-square test
	Mann-Whitney U test

SciScore is an automated tool that is designed to assist expert reviewers by finding and presenting formulaic information scattered throughout a paper in a standard, easy to digest format. ***SciScore is not a substitute for expert review.*** SciScore also checks for the presence and correctness of several unique identifiers, including RRIDs (research resource identifiers) in the manuscript, detects sentences that appear to be missing RRIDs, and can even suggest RRIDs under certain circumstances. **All RRID suggestions should be verified;** only the author can know whether the suggestions are correct.

For a full description of scored criteria and tips for improving your score, please see https://www.scicrunch.com/sciscorereport-faq
